Higher Ed HelpNow

The most advanced tutoring system available for higher ed students

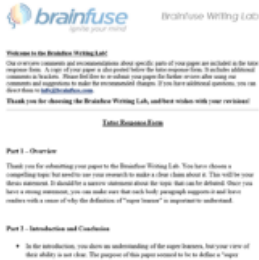

HelpNow's innovative suite of tutoring, collaboration, and study tools has helped thousands of college students build critical skills for college success. Through an experienced academic team and powerful customization tools, we work with colleges to craft effective programs for supporting student achievement, increasing retention rates, and empowering students to become lifelong learners. HelpNow consists of three integrated and mutually-reinforcing components:

Tutoring Center

Expert online tutoring, customized for your institution, in a wide range of college subjects.

Free services for all students:

Brainfuse HigherEd — Study Suite

Test Center Our Test Center provides unlimited access to an ever-expanding library of online assessments of college-level skills. Results are provided instantly and students can share the results with a tutor for targeted skills building. Test Center also includes authoring tools for instructors and students to easily create and share online tests.

Flashbulb™ One of the most versatile flashcard programs ever developed, Flashbulb lets students can easily create their own flashcards for efficient self-study. Students also enjoy 24/7 access to an extensive library of online flashcard sets in virtually every subject. [Back to Higher Ed](#)

Brainfuse Higher Ed — Collaboration Suite

Online Study Groups Students and instructors can easily schedule online study groups or hold virtual office hours in the Brainfuse online classroom.

Brainwave™ This breakthrough tool allows users to record their activity on the Brainfuse Notepad for note-taking purposes or share it with others. Brainwave is ideal for recording solutions to math or science problems, class projects, or any other concept involving motion, sequence, or animation.

Student-paid services at a rate of \$55 for two hours:

Brainfuse Higher Ed – Expert Help

For over a decade, Brainfuse has provided college students with expert writing assistance, live tutoring, and more.

LIVE ONLINE TUTORING

Students enjoy live, on-demand homework help from Brainfuse-certified tutors in a variety of college subjects. Tutors and students communicate in real-time through the Brainfuse Online Classroom.

ONLINE WRITING LAB

Brainfuse's Online writing lab is designed to help students become better writers through a unique suite of services.

- Premium Writing Lab: Students submit their writing through our secure file sharing feature and within 24 hours, our writing specialists evaluate it according to a customized rubric. Rubrics can be customized to a particular institution's evaluative preferences.
- Live Writing Lab: Students who want more immediate feedback have the option to login with a live tutor and use our file sharing feature to receive live, one-to-one writing assistance. Our live writing lab is particularly useful during the preparatory stages of the writing process.

BASIC SKILLS BUILDING

For over a decade, Brainfuse has helped students make the often challenging transition from high school to college. Our transition program is designed to individually and systematically build essential skills for college success. Areas of focus include mathematics, critical reading, and writing. The transition program consists of the following components:

- Online Assessment: Students take an online assessment to determine areas of focus. Assessments can be customized to fit within an institution's objectives.
- Individualized Tutoring Plan: Each student receives an individualized tutoring plan based on assessments results.
- Live Tutoring: Students meet with Brainfuse tutors in live, online sessions to achieve mastery of the skills highlighted in the tutoring plan.
- Progress Reporting: Regular online assessments, automatic attendance tracking, and tutor post-session reports allow the Brainfuse curriculum team and school administrators to track student progress in order to maximize program effectiveness.

24/7 QUESTION CENTER

Our 24/7 Question Center is ideal for students who have questions outside of service hours or who require a detailed, structured explanation of a difficult academic concept. Students simply submit their question (and even attach supporting documents) and we will respond within approximately 24 hours.

Subjects Tutored:

Math

- Arithmetic
- Algebra (beginning, intermediate, college)
- Trigonometry
- Calculus
- Statistics
 - Applied
 - Research Methods
 - Discipline-specific statistics including identifying commonly used software packages

Writing

Reading
